

Introduction

Hypes.zone is a decentralized messaging application that enables users to communicate directly via wallet-to-wallet interactions. With AI agent integration and a 100% permissionless architecture, Hypes.zone provides a secure and seamless experience for the crypto community. (hypes.zone)

Mission and Vision

Our mission is to provide a platform where crypto users can easily connect, collaborate, and communicate without central authority interference. We aim to bridge the gap between different blockchain communities and create an inclusive environment for all participants.

Problem and Solution

The current crypto space lacks a standardized, secure, and permissionless communication channel for wallet users. Existing platforms are often centralized, raising concerns about privacy and censorship. Hypes.zone addresses these issues by offering a decentralized messaging platform that facilitates direct wallet-to-wallet communication, enhanced with AI-driven functionalities.

Technology and Blockchain Choice

Hypes.zone is fully web-based and requires only an active wallet connection for access. The platform initially supports the Solana blockchain, with plans to expand to other networks in the future. Core functionalities include AI agent integration, direct wallet-to-wallet messaging, community spaces for wallet groups, and API integration for developers. (hypes.zone)

Tokenomics

The platform introduces the \$HYPES token, which serves as the primary currency within the ecosystem. Users can stake \$HYPES for premium features, participate in governance decisions, and earn rewards for active engagement. The total token supply and distribution models will be specified in the full whitepaper.

- 5% dev wallet is locked for 6 months. After the lock we will burn 20% of the Dev supply, each month.
- 95% is for the community.

Roadmap

- Q1 2025: Project launch and initial marketing campaigns.
- Q2 2025: Alpha version release for early testers.
- Q3 2025: Introduction of core functionalities in the beta version.
- Q4 2025: Rollout of additional use cases and features.
- Q1 2026: Public launch of the full application with all planned functionalities.

Team and Partners

Our team consists of experienced professionals in blockchain technology, AI development, and cybersecurity. We collaborate with reputable industry partners to ensure a robust and secure platform. Details on team members and partnerships will be available on our official website and in the full whitepaper.

Call to Action

We invite interested users to join our community, stay updated on developments, and participate in upcoming test phases. Visit our website at <https://hypes.zone/> for more information and join our Telegram group for the latest news and discussions.
